Trademark:

DAVE Embedded Systems is a well-established and constantly growing Italian company, focused on designing, manufacturing and selling of miniaturized embedded systems solutions. Since its foundation, back in 1998, DAVE Embedded Systems has developed its business, increasing its know-how and activities. Support and assistance provided to many Italian and foreign companies mainly concerns the design of microprocessor platforms, based on Linux, Windows or Android. DAVE Embedded Systems provides CPU modules solutions or System-On-Module (SoM) based on the latest technologies (e.g. Multi-Core ARM Cortex, PowerPC and X86) for the typical high-end markets such as medical and automotive.
